Corrections for A. Beilinson, V. Ginzburg, W. Soergel: Koszul duality patterns in representation theory, JAMS 9, 473-527 (1996)

- 1. On page 514 in 4.1.4 we should rather write $\mathcal{F}\langle 2n\rangle = \mathcal{F}(n)$ for compatibility with 4.1.6.
- 2. On page 486 in 2.10 the \bigoplus should be replaced by \prod .
- 3. In Theorem 3.11.4 (iv) the statement about P_Q having leading coefficient one is just plain wrong. Thanks to Jun Hu from Sydney for pointing this out.
